Sekolah Menengah Kebangsaan Agama Sultan Muhammad, Batu Berendam Melaka	PMR	Science	6A, 2B	December 2010

2. Working and Programming Experience

Place	Roles	Description
UiTM	Final Year Project (FYP)	<u>3D Application Developer</u> Built a computer-based application using Unity for learning purposes, the objective of the project is to explain to user about knowledge of first aid treatment. The application is capable to demonstrate how to do the first aid treatment using 3D environment and animation. The application is using C# programming language to operate and build using unity game engine. This project require 3D modelling skills where the developer should be knowledgeable in building 3D objects using 3D modelling application such as 3DMax and Blender and also require C#

programming language to apply animation to 3D object and other features of the project.

UTHM Holdings Sdn. Bhd.	Internship	<u>WordPress Web Developer</u> UTHM Holdings Sdn. Bhd. Is wholly owned company of Universiti Tun Hussein Onn Malaysia (UTHM) focusing on expanding more business activities to enhance shareholder value by creating a potential, convenient and comfortable business environment for outsiders, both individuals and companies. UTHM Holdings Sdn. Bhd. mission is to utilize the expertise and resources in making profit on UTHM. During the internship program, I was given as web developer & administration position. All of the work and task given is related to my course and I was able to use my abilities and skills as multimedia computing student. I was mainly focusing on designing and developing a website which required me to use Adobe Photoshop and WordPress as main platform in designing and developing the website. I was also using Adobe Premier Pro and Adobe After Effects for editing Video Effect.
IT Transfer Sdn. Bhd.	Front-end Web Developer	<u>PHP Web Developer</u> Responsible to build a business web application such as e-commerce, merchant market place and top up reload/bill payment system. The web application using fully PHP programming language associate with JavaScript (for interactive user interface) and MYSQL (database). The web application also require a lot of Application Programming Interface (API) provided by top up reload/bill payment provider using curl coding to access their system. Using my knowledge in managing database using MYSQL and phpMyAdmin, I am able to build a point-based system where user can buy points from the website to purchase top up reload or bill payment.

3. Skills

- Language : Good in Bahasa Melayu and English
- Technical : Good in PHP,
Good in phpMyAdmin and MYSQL,
Good in HTML5, CSS, JavaScript, JQuery and Bootstrap
Intermediate in Curl
Familiar in Java
Familiar in C++
- Multimedia : Good in Graphic Editing
Good in Video Editing
Intermediate in 3D Modelling
